Professional Profile

DevOps Student Engineer and B.Sc. Computer Science student (GPA: 91.69) with experience investigating complex infrastructure and cloud incidents across seven cybersecurity products at Check Point, while working directly with customers, Support, and R&D. Former IDF officer, full-stack developer, and geodata analyst in Unit 9900, where I developed operational intelligence tools and led a programming course for 35+ developers. Strong in leadership, ownership, rapid learning, problem-solving, and working under pressure.

Skills

- **Operations:** Incident response, escalation management, troubleshooting, PagerDuty, Opsgenie
- **Development:** Python, Flask, JavaScript, HTML, CSS, C, REST APIs, Git
- **Cloud & Identity:** SSO, 2FA, Entra ID, SSL/TLS, tenant access, certificates
- **Data & Platforms:** HAR analysis, API responses, logs, Docker, Grafana, GIS, ArcGIS, Pandas

Experience

Check Point Software Technologies **OCT 2025 – PRESENT**

DevOps Student Engineer | Infrastructure & Cloud Operations

- Investigate and troubleshoot complex infrastructure and cloud incidents across seven enterprise cybersecurity products, supporting internal teams and external customers.
- Diagnose authentication, security, and access issues.
- Collect and analyze HAR files, logger tokens, Tenant IDs, logs, and API responses; translate findings into precise technical escalations that enable R&D engineers to reach root cause faster.
- Own incidents end to end, serving as the bridge between customers, Support, and R&D while providing clear updates through investigation, resolution, and closure.
- Respond to operational alerts through PagerDuty and Opsgenie and contribute to process improvements and automation that increase reliability and team efficiency.

IDF - Unit 9900, Israeli Intelligence Corp

Army officer & full stack developer | geodata analyst **FEB 2021 – OCT 2025**

- Developed full-stack tools (Python, Flask, HTML, CSS, JS) to enhance intelligence workflows.
- Built and deployed GIS-based intelligence systems supporting operational units.
- Actively contributed intelligence solutions during major military operations "Operation Guardian of the Walls", “Alot Hashachar,” “Operation Iron Swords" and others, providing actionable insights that directly supported field teams and helped save lives.
- Led and instructed a military programming course, training 35+ developers and 7 team leaders.
- Graduated from officer training with focus on leadership, project ownership, and operational innovation.

Projects

Ogdan Mehandesim

Main Project: business website development for engineering firm **MAR 2023 – PRESENT**

- Own the full development lifecycle of a responsive business website, from requirements and UI design through implementation and deployment using Python, Flask, JavaScript, HTML, and CSS

Education

Holon Institute of Technology (HIT) **Holon, Israel**

B.SC. in computer science. GPA: 91.69 **Graduation Date: 2027**

Unit 9900, Israeli Intelligence Corps

Intensive military programming course – python & GIS **MAR 2021 – JUN 2021**

Languages

English: Fluent

Hebrew: Native language

Volunteering

Magen David Adom (MDA)

First aid attendant **2017 – 2020**

- Volunteered as a first responder during high school (Grades 10–12)
- Completed advanced training in intensive care ambulance (ALS) and mass casualty events.
